

Week 1: March 8, 2024, to March 15, 2024

What did you do yesterday?

We have finished:

- Front-end code on local machine
- Pushed code to CodeCommit

What will you do today?

We are working on:

- CodeBuild to build front-end code

Are there any impediments in your way?

We are facing some issues:

- AWS CLI login with Access Key on the AWSAcademy free account, cannot create a new user to get the Credentials
- CodeBuild decision, where should we push the code, EC2 or S3
